Live Link- <https://touchworldint.com>
- Project Name: **Okay Hospitality**
Features-Responsive for all devices, Eye catching design from figma file
Technology-JavaScript, html, css
Live Link- http://okayhospitality.com/?fbclid=IwAR0NRjXz0IYYwd2LGQ0347_INjEKXBn0NowO1zQEIr0fRf0wYwMuLfuywAM

OTHER PROJECTS EXPERIENCE

Completed Full Stack Project 30th November, 2023.

- Project Name **LetsGo** a Contest Management Project
Features- In this project user can participate in the contest. At first user need to log in then they can see the project details and can get access after paying the fees. I used stripe payment system here. If the uses are not logged in they will redirect to the Sign in page. After pay the contest fees they can get access to the user dashboard. Besides this an admin and contest creator can get access their dashboard individually and can see their activities. Admin can see approved, update and delete the contest. I used a unique swipe slider for showing the contest creator in the home page. Also I added dynamic timer for contest section which is showing the deadline the contest.
Technology-React.js, JWT, Firebase, tan stack query, axios, framer motion, tailwind, stripe, node.js, express.js, mongoose.

Completed Full Stack Project

07 November, 2023.

- Project Name **FoodEX** a Restaurant Management Project
Features-In this project a responsive navbar has Sign in option in the end. After logged in user profile picture will show there. As well as user can see their information in the user profile section. User can order food and see their ordered food item. Banner section contains an exclusive swiper slider where they can see the popular food information. On clicking all food button user can get access all food item pages. Then they can ask to see details. If the user is not logged in yet they will redirect to the sign in page. They can easily get sign in from their Google account. Here user cannot order their own added food. Also user cannot order if there is no availability of food.
Technology-React.js, JWT, Firebase, framer motion, tailwind, node.js, mongoDB.
